

NOTHING on the internet IS LOCKED

Let's talk about
Cyber Insurance

As technology develops, it is becoming increasingly important for individuals and businesses to safeguard themselves from cyber threats.

A business is not guaranteed, even with a significant investment, that its IT environment is totally secure.

Cyber insurance is an important consideration when assessing your risks and proactively preparing for potential loss or damage. Should you or your business have an IT system and/or store and process data, you should consider the cover offered by a cyber policy:

TYPES OF COVERS AVAILABLE

BUSINESS INTERRUPTION

MEDIA LIABILITY

CYBER EXTORTION

NETWORK SECURITY LIABILITY

DATA RESTORATION

PRIVACY LIABILITY

INCIDENT RESPONSE COSTS

REGULATORY FINES

Your state-of-the-art secure server systems can be accessed in minutes, by a genius hacker known only by an untraceable IP address. This is not a game you want to play.

Speak to one of our risk advisors and enquire about how you can effectively protect yourself, even in a virtual world, against the risks posed by cyber criminals.
